DETAILED ACTION

1. According to paper filed on Jan. 14, 2008, the applicants have filed a RCE.
2. It is of note that claim 60 was canceled, claims 31 and 55 were amended and furthermore, a new claim 63 was added by an examiner's amendment on Oct. 11, 2007.
3. Claims 31-56, 59 and 61-63 are now pending in the application.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 31-33, 36, 39, 41, 44, 54 and 63 are rejected under 35 U.S.C. 102(b) as being anticipated by Iijima (J. Med. Chem. , cited on applicant's form 1449).
Iijima discloses synthesis and antinociceptive activity of 7-methoxycodine. The compounds 1 and 3 (see scheme 1 on page 1321) disclosed by Iijima anticipate the instant claims when R1 represents a methyl group, R2 represents H, X represents bromine and both R3 and R4 as well as R5 and R6 together form oxo or R3 and R4 together form an oxo group while R6 represents an alkoxy group in the instant compounds of formula (I).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

7. Claims 31-33, 36, 38, 40, 41, 44, 52 and 54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Iijima (J. Med. Chem. , cited on applicant's form 1449).

Iijima discloses synthesis and antinociceptive activity of 7-methoxycodine. The compounds 1, 2 and 3 (see scheme 1 on page 1321) disclosed by Iijima meet all the limitations of instant claims when R1 represents a methyl group and R2 represents H in the instant compounds of formula (I) except that variable X represents bromine instead of fluorine, chlorine or iodine. However, bromine, chlorine, fluorine and iodine belong to the same class of halogens. Therefore, it would have been obvious to one skilled in the art to prepare the instant compounds by replacing one halogen (bromine) for instant variable X in the compounds of Iijima with another halogen (such as chlorine, fluorine or iodine) without affecting their utility of antinociceptive activity with reasonable expectation of success.
